
Jemez Springs Domestic Water Association

On the back of this page is a questionnaire/survey for you to return regarding the type of physical connection your home has to our water system. It is **EXTREMELY IMPORTANT** that we hear from you regarding this information! Please read this information carefully and respond as soon as possible. Thank you.

Frequently asked questions:

Do I *really* need to participate in this survey?

Yes. We must objectively confirm the absence (or presence) of lead containing materials in our water system. Your participation in this survey will greatly assist us in discovering and documenting the materials that make up your home's connection to our water system and whether it contains lead.

Why are we asking you these questions?

To comply with EPA Regulations, we must look at every single customer connection on the JSDWA system and objectively determine the materials connecting both the service side (meaning from the water main to the water meter) AND the customer side (meaning from the water meter to your home). We must report back to the EPA by October every year until every single customer connection has been investigated and documented. They require we make a certain amount of progress each year until the entire system has been surveyed.

When do you need this information?

As soon as possible, please! Before September 15, 2025, if you're looking for a specific due date.

Can I do this online?

Yes! Please visit www.JSDWA.org/Survey

Where should I mail this survey once it's completed?

Please send it to Jemez Springs Domestic Water Association
P.O. Box 123 Jemez Springs, NM 87025-0123

Jemez Springs Domestic Water Association

Please answer the following questions to the best of your ability:

If you do not know the answers to these questions, just leave them blank.

1. What is your service address?

2. What year was your water service installed? _____

3. What year was your home built? _____

4. What size is the service line to your home? _____

5. Do you have any photos of the installation of your water service? Yes No

You do not need to return physical photos with this form. If you have digital photos and can email them to us, that would be wonderful, and we thank you for doing so.

6. Who installed your water service line?

7. What material is the service line that connects your home to the water meter?

Circle One: Lead Copper Galvanized Plastic Unknown

8. How do you know what the material is that makes your service line?

(Have you seen it? Do you have a record of the installation? Do you have photos?)

9. Was any lead solder used for the connections to your home or within your home?

Yes No Unknown

10. Do you use point-of-entry water treatment? (Do you filter all of the water entering your home?) Yes No Unknown

11. Are you aware of lead pipes ever being present in your home, or being present between the water meter and your home? Yes No Unknown
